Annual Report

WYOMING

UNITED STATES DEPARTMENT OF AGRICULTURE
AGRICULTURAL STABILIZATION & CONSERVATION
P. O. BOX 1211
CASPER, WYOMING

C O N T E N T S

FORWARD	1
MAP OF WYOMING	2
PART I	
Agriculture Conservation Program	3-39
PART II	
Sugar Beet Program	40-45
PART III	
Price Support Programs	46-64
Farm Storage Facility Loan Program	65-66
PART IV	
Emergency Feed Program	67-68
PART V	
National Wool Act Program	69-74
PART VI	
Federal Crop Insurance Program	75
PART VII	
Wheat Allotments and Marketing Quotas	76-77

This report has been issued annually by the Wyoming State Agricultural Stabilization and Conservation Committee to summarize the accomplishment of the programs administered in the State of Wyoming. The report has been prepared especially for those interested in agriculture in this area and has been divided into seven parts:

- I - Agricultural Conservation Program
- II - Sugar Beet Program
- III - Price Support Programs
- IV - Emergency Feed Program
- V - National Wool Act Program
- VI - Federal Crop Insurance Program
- VII - Wheat Allotments and Marketing Quota Program

These programs have had far reaching effects in the economy of farmers in this state. Agricultural Conservation Program assistance to farmers in conserving soil, promoting sound farming practices and providing financial assistance to farmers on projects that they could not otherwise complete; Sugar Beet Program - payment to growers who comply with minimum wage rates and child labor regulations and proportionate shares; Price Support Programs - stabilization of price for commodities with commodity loans and purchase agreements; Federal Crop Insurance Program - Crop Insurance for farmers against losses beyond the control of the farmer.

We wish to take this opportunity to express our appreciation to the County and Community ASC Committees for the work that they have done in making these programs successful.

WYOMING STATE ASC COMMITTEE

Marvin Young, Chairman
Buffalo, Wyoming

S. Roger Mills, Member
Wheatland, Wyoming

Harold L. Jolley, Member
Lovell, Wyoming

G. H. Starr, Director
Wyoming Extension Service
University of Wyoming, Member
Laramie, Wyoming

STATE OF WYOMING

PART II

1955

AGRICULTURAL
CONSERVATION
PROGRAM

General

The Wyoming State ASC Committee takes this opportunity of recording the highlights and summarizing the accomplishments of the 1955 Agricultural Conservation Program.

Appropriations

The Appropriation Act for the fiscal year ending June 30, 1955 authorized Nationally the formulation and administration of the 1955 ACProgram at a level of \$250,000,000 including administrative costs, and provided for distribution of the appropriation between states on the basis of conservation needs as determined by the Secretary, except that the proportion allocated to any State could not be reduced by more than 15 percent from its 1954 allocation. The act further provided that not less than \$2,500,000 be transferred to the Soil Conservation Service for aid furnished by it in formulating and carrying out ACP practices and that \$1,000,000 be made available for conservation practices related to flood prevention work in approved watersheds. Out of the \$250,000,000 National appropriation Wyoming allocation was \$2,117,000. Of this amount approximately \$1,980,000 was allocated by the State Committee to be used in cost-sharing with farmers and ranchers in carrying out approved conservation practices; \$75,955.00 was transferred to the Soil Conservation Service to compensate technical services furnished by it in formulating and carrying out ACP practices; \$6,650 was allocated to compensate for specified technical services performed by ASC personnel under the supervision of the Soil Conservation Service.

Program Development

The 1955 State ACProgram was developed by the State ASC Committee (including the State Director of Extension) the State Conservationist of the Soil Conservation Service, and the Forest Supervisor. The President of the Land Grant College and the State Director of the Farmers Home Administration designated representatives to counsel with the group in the formulation of the State program.

A county Agricultural Conservation Program was developed in each county in accordance with the provisions of the State Program. Recommendations for the county program were developed by the county committee, assisted by community committeemen, the designated representative of the Soil Conservation Service in the county with the supervisors of the Soil Conservation District, the Federal Forest Service official having jurisdiction of farm forestry in the county, the county Agricultural Extension Agent and the county Supervisor of the Farmers Home Administration. From the recommendations of this group the county committee, the local Soil Conservation Service technician and the Forest Service official designated for the county, in consultation with the supervisors of the Soil Conservation District, formulated a county program and recommended it to the State Committee for approval by the State ASC Committee, the State Conservationist of the Soil Conservation Service and the Forest Service official having jurisdiction of farm forestry in the State.

Agency officials charged with the responsibility of assisting in the formulation of the ACProgram at both the county and state levels gave generously of their time and talents and are to be commended individually and collectively for their splendid co-operation.

Again in 1955 the State program provided for the development of Special, County and Emergency conservation practices by County ACProgram Development Groups. Under this provision nine counties developed Special conservation practices, twenty-two developed County Conservation practices, and four developed Emergency Conservation practices. The State program also provided authority for county groups to increase the rate of cost-sharing for one practice in a county higher than the maximum rates specified for the practice in the National Bulletin, but not higher than the cost of performing the practice, provided the increased rate of cost-sharing was needed to introduce a new conservation practice into the county or bring about a needed increase in the extent to which the practice would otherwise be carried out. Under this provision eleven counties requested and obtained approval for increased rates.

Pooling Agreements

In addition to practices carried out by individuals on their own farms and ranches there were 87 community projects carried out in 16 counties in the State. 632 farms benefited from the installation of these practices. A summary of the conservation practices carried out under 1955 Pooling Agreements is included under Part I of this report.

Summary

The following charts and tables have been developed to provide a complete picture of the conservation accomplished under the 1955 Agricultural Conservation Program.

1. The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that proper record-keeping is essential for the transparency and accountability of the organization. This section also outlines the various methods used to collect and analyze data, ensuring that the information is reliable and up-to-date.

2. The second part of the document focuses on the implementation of these practices across different departments. It provides a detailed overview of the roles and responsibilities of each team, as well as the specific steps required to ensure compliance with the established protocols. This section also includes a timeline for the implementation of these measures, allowing for a clear understanding of the progress and milestones.

3. The third part of the document addresses the challenges and obstacles that may arise during the implementation process. It offers practical solutions and strategies to overcome these challenges, ensuring that the organization remains on track and achieves its goals. This section also includes a list of key performance indicators (KPIs) that will be used to monitor the success of the implementation.

4. The fourth part of the document provides a summary of the findings and conclusions of the study. It highlights the key takeaways and the overall impact of the research, as well as the recommendations for future research and action. This section also includes a list of references and a bibliography, providing a comprehensive overview of the sources used in the study.

5. The fifth part of the document is a conclusion that summarizes the main points of the document and provides a final statement on the importance of the research. It also includes a list of appendices and a glossary of terms, ensuring that the document is easy to read and understand.

PART III

1955

COMMODITY

PRICE SUPPORT

PROGRAM

1955 Commodity Credit Corporation Program

Under the legislation in operation on the 1955 crops, support prices were available to producers of many agricultural commodities. In general, the price supports are achieved by loans on the commodities, agreements to purchase the commodities (purchase agreements), direct purchases of commodities to bolster slipping prices, and through a combination of these methods. The county and State offices in Wyoming were primarily active in the commodity loan and purchase agreement programs.

SUPPORT RATES ON 1955-CROP COMMODITIES BY COUNTIES -- The following basic county support rates were established for 1955-crop commodities with small adjustments for premiums and discounts due to variations in grade:

COUNTY	US #3 or better Corn** (bu.)	US #1 Wheat (bu.)	US #2 or better Barley (bu.)	US #3 or better Rye (bu.)	US #3 or better Oats (bu.)	US #1 Pinto Beans (cwt.)	US #1 G. N. Beans (cwt.)	Honey (lb.)	US #2 or better Grain Sorghums (cwt.)

* Applicable rate if beans are trucked to and stored in Goshen County.

** Wyoming is a noncommercial corn state. Support rate based on 75 percent of parity.

U.S. #1 Flaxseed rates set only upon request for loan or purchase agreement.

The above county support rates were based on national support rates announced as follows:

Commodity and U. S. Grade	National Rate	Percent of Parity as of Date Shown
Wheat #1	\$ 2.08	82½% of 7/1/55 Parity
Oat #3 or better	.61	70% of 9/15/54 Parity
Barley #2 or better	.94	70% of 9/15/54 Parity
Rye #2 or better	1.18	70% of 9/15/54 Parity
Grain Sorghums #2 or better	1.78	70% of 9/15/54 Parity
Flaxseed #1	2.91	65% of 2/15/55 Parity
Honey	.099 lb.	70% of 5/31/55 Parity
Dry Edible Beans #2 or better Great Northern		70% of 2/15/55 Parity
Dry Edible Beans #2 or better Pinto		70% of 2/15/55 Parity
Corn	\$ 1.58	87% of 10/1/55 Parity

COMMODITY LOAN PROGRAM -- Under the loan program, the support price was available to December 31, 1955 on honey, until May 31, 1956 on corn and to January 31, 1956 on all other crops for any grower who had an eligible commodity in approved storage. The grower retained ownership of the commodity for later marketing when this was to his advantage. The Commodity Credit Corporation funds loaned were protected by the producer's note and supplemental loans agreements, and a commodity chattel mortgage in the case of commodities stored on the farm. Warehouse stored commodities were covered by warehouse receipts and the producer's note and loan agreement as protection for the C.C.C. funds loaned.

The loans on wheat, honey and grain sorghums matured on March 31, 1956; corn loans matured on July 31, 1956; and loans on all other commodities matured on April 30, 1956.

Thirty days prior to maturity of the loan the borrower was notified that the loan would mature in 30 days. The borrower had two alternatives on the 1955-crop commodities: (1) to pay the loan in full plus 3½ percent interest, or (2) deliver the commodity to C.C.C. For wheat, the borrower had a third alternative in that he could reseal the commodity for another year. The State results are as follows.

Commodity	Quantity Placed Under Loan	Quantity On Which Loan Was Repaid	Quantity Resealed	Quantity Delivered to CCC
Wheat	525,274 bu.	82,075 bu.	67,180 bu.	376,019 bu.
Dry Edible Beans	182,251 cwt.	58,636 cwt.		123,615 cwt.
Barley	74,810 bu.	73,423 bu.		1,387 bu.
Oats	43,543 bu.	41,924 bu.		1.619 bu.
Honey	99,370 lbs.	99,370 lbs.		
Corn	2,016 bu.	2,016 bu.		
Rye	24,622 bu.	624 bu.		24,098 bu.
Flaxseed	250 bu.			250 bu.
Grain Sorghums	414 cwt.	414 cwt.

FARM STORAGE FACILITY LOAN PROGRAM

PURPOSE - Safe and adequate storage of the crops produced through the toil of producers and the favorable smile of "Mother Nature" has long been a problem with the farmers of our great Nation. Credit to obtain the funds necessary to build safe and adequate storage has not always been available to producers and thus many farms did not have adequate storage for their crops. The Farm Storage Facility Loan Program was inaugurated in June, 1949, for the purpose of supplementing local credit services when normal lending agency credit is not available. These loans are available to Wyoming producers of wheat, corn, oats, barley, grain sorghums, soybeans, dry edible beans and peas, flaxseed, hay seeds and pasture seeds.

GENERAL - Since the inauguration of the Farm Storage Facility Loan Program in June, 1949, a total of 3,486,007 bushels of new farm storage has been erected through these farm storage facility loans. The total amount loaned is \$965,270.24. As of June 30, 1956, a total of 1,369 loans had been disbursed with 886 of them completely repaid in the amount of \$531,499.78 principal plus 4 percent interest. In other words 55.1% of the loans made have been completely repaid. The remaining loans that are only partially repaid are 49.5% repaid. The remaining outstanding balance of all loans made is \$219,070.51 or 22.7% of the total amount loaned. In view of the fact the loans run for 4 and 5 years, we believe the above repayment record is outstanding.

RESULTS OF PROGRAM - Adequate farm storage for storable crops makes it possible to regulate the flow of crops to market. A regulated flow of crops to market reduces waste, alleviates crowded transportation facilities at harvest time, affords the producer a chance to market at the most opportune time and assures the consumer a supply of the crop at all times.

As a result of this program farmers of Wyoming are now able to practice more orderly marketing of their storable crops raised for sale and to safely store their feed crops on the farm rather than selling their feed crops in the fall and buying back the same or equivalent feed in the winter and spring.

A cumulative summary by counties follows:

CUMULATIVE INDEBTEDNESS OF FARM STORAGE FACILITY LOANS

PART IV

EMERGENCY

FEED

PROGRAM

1955 DROUGHT EMERGENCY FEED PROGRAM

As in the summer of 1954 several of the counties in Wyoming experienced severe drought conditions in the summer of 1955. Stockmen were forced by lack of feed on the range to move their herds from winter to summer pastures away ahead of the time that herds were usually moved. Farmers and ranchers who normally depended on their own pasture and forage crops for livestock feed were forced to turn to other than normal sources for their feed requirements.

As a result of such drought conditions, it was necessary to take some action in order that farmers and ranchers could receive help in maintaining their basic foundation herds of cattle and sheep through the critical drought period.

Through the combined efforts of the State USDA Drought Committee and local County USDA Committees the following counties were approved for Drought Emergency feed on November 1, 1955. Albany, Carbon, Sweetwater, Hot Springs, Fremont, and Platte. On November 30, 1955, Uinta County was approved, and in February of 1956, part of Lincoln County was approved. The responsibility for administering the Drought Emergency Feed Program was delegated to the State ASC Committee. The approval of application for feed was the responsibility of the local Farmers Home Administration Committees.

The approved grains under the program consisted of corn, barley, grain sorghum, and oats. Feed in the form of pellets or cubes was classified as Type "A" which had to contain 75% by weight of approved grain and Type "B" feed which had to contain 60% by weight of approved grains.

The program operated in 1955 in the same manner as it did under the 1954 program. An operator would first obtain an approved application for feed from his local FHA office. He would then present the approved application to the local County ASC Office and on the basis of the approved application for feed the County office would issue a purchase order to the operator. This purchase order would permit the operator to purchase feed at a reduced price of \$1.00 per cwt. of straight eligible grain or mixed feed from any approved dealer of his choice. After delivering the feed to the operator as shown on the purchase order, the dealer would then present the purchase order to the County ASC Committee who issued the purchase order and receive a dealers certificate. The dealers certificate was made out for an amount equal to the cwt. of feed delivered to the operator times \$1.00. The dealer would then buy approved surplus grain from the CCC stockpile and use the dealers certificates at face value as part payment for grain purchased.

The program terminated on May 15, 1956 and the FHA did not accept any more applications for feed after April 20, 1956.

PART V

1955

NATIONAL

WOOL ACT

1955 MARKETING YEAR WOOL PROGRAM

GENERAL - It has long been recognized that the wool industry is one of the most important industries in Wyoming. Several Wyoming counties rank among the top twenty-five wool producing counties in the nation. Carbon county ranks first in the nation in the production of wool.

The Congress of the United States recognized that wool is an essential and strategic commodity, which is not produced in quantities and grades in the United States to meet the domestic needs; and that the desired domestic production of wool is impaired by the depressing effects of wide fluctuations in the price of wool in the world markets. In order to promote and encourage the desired production of wool in the United States, Congress passed the National Wool Act of 1954.

This act would provide for the support of wool and mohair prices from April 1, 1955 to March 31, 1959. The support price would be established at such incentive level as the Secretary of Agriculture deemed necessary to encourage an annual production of wool, with the declared policy of the law. This incentive level was established at .62¢ per pound for both the 1955 and 1956 marketing year.

1955 MARKETING YEAR INCENTIVE PAYMENT - The incentive payment to be made to producers of wool which is sufficient to bring the national average price received for wool marketed in any one marketing year up to the announced incentive level of wool for that marketing year. The national average price, received by producers of wool for the 1955 marketing, was 42.8¢ per pound. The payment rate announced for the 1955 marketing year was 44.9% of the net amount received for the sale of wool in the 1955 marketing year by the producer. The lambs and yearlings payment was .77¢ per hundredweight of lambs sold for slaughter.

RESULTS OF SHEEP AND WOOL PRODUCERS REFERENDUM - The Secretary, under his authority, entered into an agreement with the American Sheep Producers Council to develop a program for advertising promotional, and other related market developing activities to improve the market for products of the industry. The cost of such an agreement was to be deducted from payments to producers at the rate of .01¢ per net pound of wool sold, and .05¢ per hundredweight of lambs and yearlings sold. Such deductions had to be approved by the wool producers in a referendum which was held between June 27 and August 19, 1955.

The referendum passed on a national basis. As a result of the referendum the agreement with the American Sheep Producers Council will be in effect for the duration of the wool program.

SUMMARY - The following tables give a good picture of the 1955 wool program as it applied to the State of Wyoming.

PART VII

1955

FEDERAL CROP
INSURANCE
PROGRAM

FEDERAL CROP INSURANCE IN WYOMING - 1955

During the 1954 crop year the Agency Plan was placed into operation by the management of the Federal Crop Insurance Corporation and as of January 1, 1954, the county and state ASC Offices were no longer responsible for the administration of the Crop Insurance Program.

The Multiple Crop Insurance Program was discontinued in Fremont County after the 1954 crop year, together with the Bean Insurance Program in Big Horn County. The wheat insurance program in Campbell County carried through the 1955 crop year and then was discontinued for 1956.

The crop insurance losses were again heavy in the southeast counties of the state with the exception of Laramie County.

Program	Counties	No. Policies in Force	No. Units Earning Premium	Amount of Premium	No. of Units Indemnities	Amount of Indemnities

PART VIII

WHEAT
ALLOTMENTS
AND
MARKETING
QUOTAS

WHEAT ACREAGE ALLOTMENT AND MARKETING QUOTA PROGRAM 1956 - Crop

WHEAT ACREAGE ALLOTMENT

Secretary of Agriculture, Ezra Taft Benson, again exercised his authority under the law and proclaimed wheat acreage allotments in effect for the 1956 crop of wheat. The 1956 National Wheat Acreage Allotment was established at 55,000,000 acres which is the minimum allotment which can be established by law. With the tremendous surplus of wheat on hand in the United States, our needs could have been satisfied with considerably less wheat than 55,000,000 acres.

The National wheat acreage was apportioned to each state on the basis of the average seeding of wheat for the previous ten year period adjusted for trend and weather conditions. Wyoming received a 303,725 acre allotment for 1956 as it's share of the National Allotment. This represented an increase over the 1955 State Allotment of 12,506 acres.

The 1956 State Wheat Acreage Allotment was apportioned among the counties in the same manner as the National Allotment was portioned to the States, on the basis of the previous ten year average seeding of wheat adjusted for trend and weather conditions. The following table shows the 1956 State Acreage Allotment by counties. The State Committee held a reserve of 400 acres for new farms and 600 acres for appeals and corrections, releasing 302,725 acres to the counties.

WHEAT ACREAGE ALLOTMENT AND MARKETING QUOTA PROGRAM
1956 - Crop

MARKETING QUOTA PROGRAM

On June 25, 1955, Secretary of Agriculture, Ezra Taft Benson, proclaimed a National Marketing Quota for the 1956 crop of wheat. The Secretary must by law, proclaim wheat marketing quotas when the total supply of wheat exceeds the normal supply by more than 20%. This condition existed and a National Wheat referendum was held on June 25, 1955 to determine if wheat growers favored Marketing Quotas on the 1956 crop of wheat. At least two-thirds of the eligible wheat growers voting in the referendum must favor Marketing Quotas before they become effective for the 1956 crop of wheat. The National referendum carried which meant that the government would support the 1956 crop of wheat at 76% of transitional parity of \$2.38 a bushel or \$1.81 a bushel on a National average. The following table shows the results by counties of the voting in the referendum held June 25, 1956.

COUNTY	VOTES FOR	VOTES AGAINST	TOTAL VOTES	PERCENTAGE FOR
Albany	0	0	0	-- --
Big Horn	27	1	28	96.4
Campbell	162	36	198	81.8
